TECHNOVA SOLUTIONS

Employee Handbook

Onboarding, workplace conduct and employee services

DEMO DATA NOTICE
Fictional policy content created solely for the SecureRAG portfolio project. All names, email addresses, procedures and monetary limits are synthetic examples. Do not treat this document as a real employer policy.

1. Welcome and company overview

TechNova Solutions is a fictional mid-sized IT services company that provides software engineering, cloud operations and technical support services. This handbook is a sample knowledge document for the SecureRAG project.

2. Onboarding checklist

New employees complete the following onboarding steps: (1) submit required joining forms to HR, (2) collect an assigned laptop and access card from IT, (3) enroll in multi-factor authentication, (4) complete security awareness training, and (5) meet their manager to review role expectations.

The manager should confirm that the employee has access only to the systems required for their role. Access requests must be submitted through the IT service desk.

3. Workplace conduct

Employees are expected to communicate respectfully, protect company and customer information, avoid conflicts of interest, and follow applicable company policies.

Harassment, discrimination, retaliation, intimidation and misuse of company resources are not acceptable. Concerns may be raised with HR Operations or the employee's manager.

4. Probation and performance

New employees normally have a 6-month probation period. The manager should hold a progress discussion around the third month and a final review before the probation period ends. Confirmation is communicated in writing by HR.

5. Learning and development

Employees may request role-related training through their manager. Training approval depends on business needs and the available learning budget. Completion evidence should be uploaded to the learning portal.

6. Employee records and privacy

HR records are accessible only to authorized HR personnel and other approved staff with a business need. Employees should not share another employee's personal, payroll or performance information.

To correct personal details, contact hr@technova.example. Do not send passwords, one-time passcodes or identity documents through ordinary chat.

7. Sample employee directory entries

These are invented test identities and contact details using reserved example domains and non-production phone numbers. They do not identify real employees.

EMP-1042 — Asha Mehta — Software Engineer — a.mehta@technova.example — Department: Engineering.

EMP-1077 — Rohan Iyer — IT Support Analyst — r.iyer@technova.example — Department: IT Operations.

EMP-1113 — Neha Kulkarni — HR Associate — n.kulkarni@technova.example — Department: People Operations.
